## Soundtect Acoustical Panels: The Fusion Of Beauty & Functionality

Recyclable • Recycled • Paintable

Soundtect offers multi-dimensional, sculpted, acoustic panels to give a discrete sound-control system wrapped in sophisticated design.

Available in different designs, Soundtect acoustic panels are made from recycled materials, are recyclable and can be painted on to match any environment.

- Simplified installation on walls and ceilings. The panels themselves are easily hung on walls and can be used to create floating ceilings that absorb sound and enhance its quality.

- Better balancing of sound by offering ideal acoustical buffering to increase speech intelligibility in a specific area while reducing background sound noise levels.
- A better way to transform open, sound-challenged spaces into more comfortable environments.
- Sound enhancement with unique design features. The exceptional design quality of the acoustical panels enables them to fit into virtually any design theme while adding an elegant and functional decorating feature. Soundtect acoustical panels are ideal in many settings that can benefit from improved sound

quality in the indoor environment. The correct selection of Soundtect acoustical panels can provide the perfect boost to:

- Make open spaces more welcoming – By absorbing sound and enhancing sound intelligibility; Soundtect acoustical panels can transform even cavernous spaces into more pleasing environments.
- Make rooms more functional – Whether a room's purpose is for greeting clients, recording music or simply living. Soundtect panels restore proper sound levels while enhancing the functionality of a space.

An unexpected encounter

## Waterfall

A series of gentle curves cascade, transforming a vertical surface into an unexpected encounter with textured light and shadow.

“Waterfall” is the first pattern in a collection of fine acoustic wall and ceiling surfaces from Soundtect.

Offering an array of engaging motifs, Sound tech’s panels are designed to reward the eye and influence their surroundings.

Composed of recycled materials they may be painted to complement the décor.

An intriguing  
ambience

## Tetris

The Tetris acoustical panel is the fusion of design, beauty and elegance. This stunning panel blends visually pleasing geometric shapes with ideal buffering to create an acoustical enhancer that absorbs sounds, helps balance reverberation and creates a more pleasing environment.

The distinct square and raised circle design belies its true purpose, resembling artwork more than the functional building material that it is. Ideal for use in residential and commercial settings, the Soundtect - Tetris panel is the epitome of acoustical design perfection. All Soundtect panels are paintable, recyclable, and made from recycled materials.

## Tetris

With its stunning geometric design, the Tetris acoustical panel is right at home in the board or meeting room. This wall panel is perfectly suited for serving double duty, providing an incredible sound buffer while also functioning beautifully as part of a room's design.

This panel absorbs sound, provides reverberation balance and is simply designed to create a more pleasing environment. The clean lines of this panel are offset with distinct raised circles making the final design look more like a work of art than an acoustical panel. These panels may also be mounted on ceilings.

A more pleasing  
environment

## Contour

While these panels serve as their own distinct design element, they also provide the acoustical enhancements required for this setting. These panels are meant to balance reverberation, absorb sound and create an environment that lets a performance's sound quality shine through.

In an understated pattern "Contour" is an embossed design that enhances the walls of an interior. For designers looking for a panel that does its work quietly, here is the perfect solution.

Soundtect, producer of fine acoustic wall and ceiling panels, offers a variety of artistic motifs. From the elegantly sculptural, as the focus in its setting, to the more subtle motifs, all perform their sound control function in keeping with industry standards.

Composed of recycled materials, most of the panels may be painted to match or contrast with their settings.

Confident presence

## Twig

Movement is the theme of these dimensionally sculpted panels. Mounted in a matched run on a wall, the motif excites the eye. Painted to contrast with its setting, "Twig" is a confident presence in the space.

From Soundtect, comes a collection of fine acoustic wall and ceiling panels.

Producing sound control technology composed of recycled materials, a variety of original motifs is designed to define the essence of exceptional decor.

An artistic focus

## Linear

Individual panels, that seem simple at first glance, “Linear” provides a pattern that lends itself well to any indoor space. The “Linear” acoustic panels are composed of recycled materials and, being designer friendly, all panels may be painted to match or contrast with the décor. With its neutral colors and clean, geometrical lines, Soundtect’s “Linear” wall panel is the perfect choice for any interior that can benefit from acoustical balancing. This wall panel was created especially to serve as a design element while offering the sound benefits busy facilities require. Uniform boxes in neutral beige are interrupted only by a thin line of stained wood that creates a diversion in the pattern and adds to the panel’s simplistic beauty. While the Linear wall panel creates a visually appealing pattern, its real purpose is not lost in the elegant design. This panel provides exemplary sound absorption and reverberation balance to create an indoor atmosphere that is more welcoming to clients.

3-dimensional nature of space

## Splat!

With its bright and welcoming colors, the Splat! ceiling panel is more than an acoustical enhancement – it's a work of three-dimensional art. Adding a distinct visual appeal to any room, this panel is especially suitable for schools, play areas and any other place children frequent. Featuring an elevated floral set on a background of white, this panel's beauty belies its true functionality.

The Classroom panel is designed to balance reverberation, absorb sound and create a more acoustically pleasing environment. As all other Soundtect panels, Splat! panels are paintable, recyclable, and made from recycled materials.

## CELESTE

Creating the perfect acoustical environment for a music room has never been more stylish. Our “Celeste” wall and ceiling panel is designed to balance reverberation, absorb sound and create an audio atmosphere where sound comes through crisp and clean. This distinct panel also provides a visually pleasing design element to any room. Its distinct star swirl design pleases the eye and camouflages its true intent, making it look more like a work of art than a functional fixture. Due to its visual distinction and superior acoustical qualities, this panel is idea for both commercial and residential settings. Since all Soundtect panels can be painted, color selection is infinite. In resonance with the natural world, Soundtect panels are “green”— a composite of recycled materials that may be recycled again.

Echoes of a Matisse abstract
